

# Year One Weekly Newsletter

12 May 2017

This week has been a creative one for the children with an exciting art focus. They have been looking at 3D flower sculptures and designing their own versions. Using a selection of materials, the children have been creating their own floral art works.

At home why not create your own flower sculpture together using recyclable materials you can find around your home? You could then take a photo and bring in into school.

## Maths Challenge!

As part of the Year One curriculum the children are moving onto subtraction and division next week. Why not set up a mini sweet shop at home this week and practise sharing sweets with people. How many sweets did we start with? How many did we each get?

## Writing Challenge

We will be looking at story prediction next week and creating our own story endings. Read your child the first couple of pages of a book at home and see if they can think of their own ending. Have them jot their ideas in their homework books.

## Pop - Ins

Thank you to all of the parent who were able to make it to the pop-ins. The children really enjoyed having you there and showing you what they have been learning.

## Sickness Bug

As you are probably aware there has been a sick bug making its way around school at the moment. Could we remind all that children should have 48hrs off after being sick to help stop the bug spreading.
