

Year One Weekly Newsletter

18 November 2016

Maths Challenge!

This week in Maths we have been learning about halving and sharing into equal groups. Encourage children to practise learning halving facts. They could count out sweets and practise sharing them equally with a friend. Children could then practise sharing into 4 equal groups as quarters. Does each group have the same number?

Writing Challenge

We are very excited for our trip to the deep on Monday. Please encourage children to think of questions they would like to ask whilst they are there.

Non-uniform days

We will be having two non-uniform days this term. The first will be on Friday 25th November. Children will be asked to bring in some chocolate or a raffle prize for our Christmas raffle. The second one will be on Friday 9th December. Children will be asked to bring in £2. The money raised from this, together with a school contribution will go towards a Christmas theatre production in school on the last day of term.

Parent Pop-ins

As we have our year one visit to the deep on Monday there will be no parent pop-in next week. We will be having two pop-ins during the following week (Monday 28th November and Thursday 1st December). You will be given an invitation next week which will tell you which day we would like you to come. If you have a preference then please let the class teachers know.
